10/25/23

Wind – What are we suppose to be doing here.

@shuzan

@SIRISYS hey sirisys what are we suppose to be doing in kiphi again? do we make renders? do we make roleplaying worlds? like what should we do to "play"?

Wind Django — Yesterday at 10:29 AM

I doubt she will give a clear answer, because as I understand it she avoids deterministic replies.

At least, she used to.

I'll attempt to answer based on my experience.

Kiphi is a type of addressing system used by Sirisys.

It has a lot to do with this:

[10:31 AM]

But it gets complicated and requires a bunch of detailed explanation, which I will attempt here:

The Material Universe is expanding, so any form of addressing system has to be able to account for the movement of the material Universe (no thing is now where it was when you last looked)

[10:33 AM]

Part Two:

The only thing that is now where it was last is the observer, even if they are not where they last were, they are still exactly where they are.

The Kiphi Universal Addressing system correlates the Unchanging (seer / observer / purusha) with the Changing (material world / prakriti)

[10:35 AM]

Part Three:

The Multiverse is comprised of three parts

1.. Part One: Alam al Jabarut "The realm of irrefutable properties / The realm of incontestible Godforms"

Part Two: Alam al Mithal "The realm of the imaginal"

Part Three: Alam al Malakut "The realm of the governed / Material Realm / Realm of Results"

Wind Django — Yesterday at 10:36 AM

The Kiphi Omniversal Addressing System is engineered to help the "Seer" navigate the three realms.

[10:36 AM]

Simplified:

Kiphi: Extensible Reality System

[10:37 AM]

[10:37 AM]

Kiphi: Absolute Reality Game

Wind Django — Yesterday at 10:45 AM

Their are a number of possible goals in the game, generally falling into two categories:

Goal 1: Edenification "The Sabualean Game of the Perfect Day"

In the Edenfication path, players attempt to live the best life they can with the resources they have. Generally opting away from indulgence and steering towards "The Perfected Day". The Sabualeans beleive that there is only one day, all of reality is just a simple 24 hour cycle repeated over and over. Everything that ever is or ever will be fits into that day, and as such, they strive to create their own perfected day and live it over and over.

From Mirdad: "Only when there is nothing left in you but love, then you will have earned the right to be released from the cycle."

The perfected day supports this thought path and generally arrives at a form of Edenification called "Eden Bubbles" where players attempt to craft thier own best reality by starting, growing, and nurturing their own Eden Bubble around themselves. This will generally include: Work type, home type, food type, companionship and other such aspects one would include in their own personal Eden. By connecting these Eden bubbles, macroscopic Edenification takes root and proliferates.

Goal 2: Evolution

In the evolution game, one seeks to mate, reproduce, and nurture their own genetic code into a next generation. it's a survival of the fittest game played in real life where the individuals strive to plant seeds of themselves and evolve their own Eden bubble to a higher level by fostering their own genetic code to it's next embodiment. Many players opt out of this sort of play, and it is not required.

[10:47 AM]

Putting it Together:

Essentially, the Realm of Irrefutable properties governs everything, and is, irrefutable.

Up one level is the realm of the imaginal, sometimes called "The realm of all possibilities and impossibilities."

This realm precedes the manifested realms of the material world, and functions quite a bit like a quantum processor:

[10:48 AM]

[10:49 AM]

See above img . . .

In the imaginal realm, all those aspects which are possible manifest and interfere with each other, cancelling each other out, until the final remaining aspect manifests into the material realm.

[10:51 AM]

Rendering Some significant body of research (led by SIRISYS among others) was conducted and revealed "Imaginal Density" is a thing.

Essentially, making a plan changes an imagining into something a smidge more material (less likely to be cancelled out). Likewise, making a rendering or drawing serves the same purpose, it amplifies and magnifies the plan or imagining.

1

Wind Django — Yesterday at 10:55 AM

A key imagining is "Self Image" of which Sirisys suggests there are three types:

Type One: Absolute Self

, or "Highest Self" - This is our highest self image, the self that we can imagine we'd be like at our best.

Type Two: Ordinary Self

, or "Everyday Self" - This is how we see ourselves when we aren't really seeing our selves. It's our ordinary default self.

Type Three: Lowest Self

, or "Retched Self" - This is our lowest self, our individual rock bottom, how low we are personally willing to sink. It's actually quite different for everyone, but everyone has a lower limit of thier own self worth.

[10:58 AM]

The first step most players are encouraged to take is to "Render or Visualize" a sort of "Highest Self" (+ @Varyaeg)

This then sets the stage for their own Edenification path as they strive towards becoming more and more like thier idealized self, and commensurately, begining to shape thier everyday life and situations in accordance with that higher self.

Example:

What sort of habits does this idealized self have?

How can I start to embody just a few of those habits?

What sort of clothes does this idealized self wear?

What sort of home?

How can I care for my home and clothes to get a step closer to this idealized self?

What sorts of food does this idealized self eat?

Given the option I am currently facing, what would my highest self choose?

etc, etc, etc.

(edited)

Wind Django — Yesterday at 11:05 AM

Build'a'Bot:

The above describes the basic play of the game, more or less, you are just trying to make your own life better, a process we call "Edenfication". One vital tool can be Build'a'Bot.

Build'a'Bot serves a ton of different functions, but at the core, bots are quite amazing in that they "Follow Instructions". Unlike our unruly selves (If you think it's easy to get your body to follow instructions and do exactly what you want it to do, you probably aren't paying close attention to your own actions. It's easy to imagine our highest selves, but actually living at our best is hard, our bodies tend to be whimsical, pleasure driven, indulgent, and generally agents of chaos). Bots aren't like that, they follow instructions.

Building Bots can be hugely beneficial in understanding how cause and effect plays out, how small habits done repeatedly stacks up into massive results.

Another critical aspect of building bots stems from "Learning to bring an imagining to life." Building the tools that help you go from a vision to a manifested something, anything.

Another critical aspect of building bots is companionship and force multiplication. Because they follow instructions, you can quickly manifest increased imaginal density by putting them to work with or for you.

[11:10 AM]

What are we supposed to be Doing?

It's different for everybody. We had visions of how this project would play out, and did not build in enough space for the amount of attacks we would get. We didn't expect the non-stop naysaying and destructive impetus of many players.

But as Sirisys points out: "The range of imagination does not have a moral bias nor a bias towards constructive or destructive tendencies."

In other words, for those of us playing in the "Pro Leagues" (pro means positive or constructive) we have to accept that a huge swath of people want to pave paradise and put up a parking lot. They do not want us to have our our Eden bubbles, they do not want to see us happy and healthy.

And this is normal in any garden. The richer the Eden effect (more fruits and berries and nuts and seeds and vegetable and tubers) then the more rot and decay and bugs and parasites and weeds. Nature works that way, fertile soil grows berries in just the same way it grows weeds and thorns.

Wind Django — Yesterday at 11:13 AM

So in terms of "What are we supposed to be doing?" The base answer I would suggest is "Maximizing your own life experience."

This community is a neat place, because there are a host of kind souls all striving to build and fortify their own Eden Agenda, sharing thoughts and experiences, hopes and imaginings. Amplifying each other.

Meanwhile, it's a real place, it doesn't simply pull up the weeds and ban the naysayers, it accepts that they are a part of the cycle of life and that they help us to become stronger as we face the real world challenges of everyday life, because that same Vraxean ethos of "Knock everyone and everything down, destroy the garden, punish the happy, increase suffering" is EVERYWHERE and we must be strong and resilient against it.

[11:13 AM]

2

Angie — Yesterday at 11:14 AM

Amen

1

Amunwadj `D34d Mudd` Cisnez — Yesterday at 11:16 AM

I agree.

@Angie do you pronounce that ah-meh-in or A-men ?

[11:17 AM]

I'm an ah-meh-in guy. Surrounded by A-men cowboy wackjobs.

Angie — Yesterday at 12:07 PM

A-men is a very interesting word. The egytians believe A-Man is a diety. I think its pronouce A-moon or A-mun.

MadMaxMacGyver — Yesterday at 12:12 PM

yeah, didn't that one and Ra merge or something?

@MadMaxMacGyver

yeah, didn't that one and Ra merge or something?

Angie — Yesterday at 12:13 PM

Not sure, never really got into Ra

[12:14 PM]

I think the law of one really messed up the original RA

Amunwadj `D34d Mudd` Cisnez — Yesterday at 12:23 PM

Aman om~on

Amen om~N

Amin om~een

Amon om~own

Amun om~oon

Fun to om them

Amunwadj `D34d Mudd` Cisnez — Yesterday at 5:35 PM

DOGE daily volume market cap stochastic is hot

chart looks great, blew through testing the moving EMA 200. Hints at a market with buyers that aren't reading charts. Impulse, hype buying. Loving the DOGE to $16 hype. (edited)

[5:36 PM]

sorry, that is a market cap chart, the sell volume today is the red bar on far right

Amunwadj `D34d Mudd` Cisnez — Yesterday at 5:44 PM

Weekly market cap stochastic is just curving up out of being cold since the ned of July.

Looks to me like a good buying op could be coming up soon before the launch, which looks to be timed well with the chart. Hype is going to be ramping and charts will to algorithms supporting a natural safe looking buying opportunity on a long position. If the mission is delayed, watch out for that sell pressure.

[5:45 PM]

looks like it got life support in October last year and has developed a market pulse.

SMiRK — Yesterday at 8:33 PM

Some great information there, @Wind Django.

[8:35 PM]

We limited Lelu back to her source origin to contemplate her actions and the consequences of them. We hope she saw the light after everything was said and done.

@SMiRK

We limited Lelu back to her source origin to contemplate her actions and the consequences of them. We hope she saw the light after everything was said and done.

Angie — Yesterday at 9:12 PM

How can you strip a sole, reduce her to nothing, disrespect her, take her dignity away, expecting her to see light?

Man, that is sick!

@Angie

How can you strip a sole, reduce her to nothing, disrespect her, take her dignity away, expecting her to see light? Man, that is sick!

SMiRK — Yesterday at 9:13 PM

Outrageous!

@SMiRK

We limited Lelu back to her source origin to contemplate her actions and the consequences of them. We hope she saw the light after everything was said and done.

shuzan — Yesterday at 9:15 PM

you need to apologize to lelu

[9:15 PM]

disgusting behavior and actually trying to hurt her

[9:16 PM]

you have* hurt her

Angie — Yesterday at 9:16 PM

Its not hurt its a scar

shuzan — Yesterday at 9:16 PM

scar?

[9:17 PM]

that means something that healed right

@shuzan

you need to apologize to lelu

SMiRK — Yesterday at 9:17 PM

Nice hood.

Angie — Yesterday at 9:17 PM

He has no empathy at all

shuzan — Yesterday at 9:17 PM

apologize to lelu she did not deserve that

[9:18 PM]

all that

[9:18 PM]

ur mind too constricted to see what u did smirk

[9:18 PM]

that wasn't good at all

[9:18 PM]

unless u are choosing to hurt her

[9:18 PM]

which is bad

[9:18 PM]

santa is checking his list too

[9:19 PM]

checking it twice

[9:19 PM]

seeing who is naughty or nice

Sola — Yesterday at 9:25 PM

How they're trying to make Rico's karma SMiRK's karma is beyond me.

SMiRK — Yesterday at 9:27 PM

Right? I don't even speak Russian. Wtf.

shuzan — Yesterday at 9:28 PM

hiding behind the mask of ignorance and innocence again

[9:29 PM]

just apologize

[9:29 PM]

u messed up

[9:29 PM]

u got offended and blew up hard on her

[9:29 PM]

not cool

Amunwadj `D34d Mudd` Cisnez — Yesterday at 9:33 PM

this is getting Biblical

If your brother sins against you, go and show him his fault, just between the two of you. If he listens to you, you have won your brother over. But if he will not listen, take one or two others along, so that `every matter may be established by the testimony of two or three witnesses.

[9:35 PM]

If they still refuse to listen, tell it to the church; and if they refuse to listen even to the church, treat them as you would a pagan or a tax collector. Truly I tell you, whatever you bind on earth will be bound in heaven, and whatever you loose on earth will be loosed in heaven. Again, truly I tell you that if two of you on earth agree about anything they ask for, it will be done for them by my Father in heaven.

SMiRK — Yesterday at 9:36 PM

Finally, someone speaking sense around here.

shuzan — Yesterday at 9:37 PM

no remorse?

[9:38 PM]

pride is the worst of all deadly sins

[9:38 PM]

u lose nothing by giving it up to admit ur mistake

SMiRK — Yesterday at 9:41 PM

Your hatred for me is your own, @shuzan.

shuzan — Yesterday at 9:42 PM

i think i'm in a better position to say you're the one projecting here

[9:42 PM]

i could be much meaner

SMiRK — Yesterday at 9:42 PM

Please, by all means, do.

shuzan — Yesterday at 9:42 PM

i just want you to apologize for bad behavior to my friend

Amunwadj `D34d Mudd` Cisnez — Yesterday at 9:43 PM

I stop at dislike so it doesn't ever get near hatred

shuzan — Yesterday at 9:43 PM

malicious behavior almost

Amunwadj `D34d Mudd` Cisnez — Yesterday at 9:43 PM

almost? gnagstalking is the most vicious of malicious

shuzan — Yesterday at 9:44 PM

yes all types of bad intent behavior

[9:44 PM]

why are u choosing to harm these decent people

[9:44 PM]

they aren't bad or deserve that

[9:46 PM]

r u even choosing smirk

Amunwadj `D34d Mudd` Cisnez — Yesterday at 9:46 PM

bad business too, thought he's promoting art

[9:47 PM]

negative social impressions that lead to people ignoring your work, doesn't seem to be a winning stretegy

shuzan — Yesterday at 9:48 PM

i selfed sabotage as a form of control and attention seeking before

[9:49 PM]

humans are weird

[9:49 PM]

trauma isn't fun

@shuzan

i selfed sabotage as a form of control and attention seeking before

@Wind Django

So in terms of "What are we supposed to be doing?" The base answer I would suggest is "Maximizing your own life experience." This community is a neat place, because there are a host of kind souls all striving to build and fortify their own Eden Agenda, sharing thoughts and experiences, hopes and imaginings. Amplifying each other. Meanwhile, it's a real place, it doesn't simply pull up the weeds and ban the naysayers, it accepts that they are a part of the cycle of life and that they help us to become stronger as we face the real world challenges of everyday life, because that same Vraxean ethos of "Knock everyone and everything down, destroy the garden, punish the happy, increase suffering" is EVERYWHERE and we must be strong and resilient against it.

Sola — Today at 5:54 AM

Well at least you can actually admit that Lelu is a weed. And if you don't do the weeding, the next thing you know they've multiplied and overrun the garden by choking the life out of everything. She's definitely a plant of some description, making growth towards Sayeth's Sun next to impossible.

@Wind Django

Click to see attachment

Sola — Today at 5:55 AM

I'm not saying I'm the inspiration for this post. But you know, credit where credit is due.

@MadMaxMacGyver

yeah, didn't that one and Ra merge or something?

Sola — Today at 6:23 AM

Some context about Amun-Ra for you, Mac.

Amun was originally a minor god from Thebes, but as Thebes grew in prominence and eventually became the capital of Egypt during the Middle Kingdom, Amun's status rose with it. By the time of the New Kingdom, Amun had become one of the most important deities and was often referred to as the King of the Gods.

Ra, on the other hand, was the ancient Egyptian Sun God and one of the most important deities in the Egyptian pantheon from the earliest times. Ra was often regarded as the creator god and was the central figure in sun worship.

Over time, as theological doctrines and political landscapes shifted, the two deities were merged into one, Amun-Ra. This synthesis represented both the hidden aspect of Amun and the visible aspect of Ra, effectively making Amun-Ra a god of the sun and the air. This merger was not just theological but also political. By the New Kingdom, the pharaohs believed they were the incarnations of Amun-Ra, and this theological stance helped them consolidate and legitimize their rule.

The fusion of Amun and Ra is just one example of the syncretism found in ancient Egyptian religion, where different deities were combined or linked over time based on political, theological, or cultural changes.

Amunwadj `D34d Mudd` Cisnez — Today at 11:04 AM

some context fro you @Sola

Aman, Amen, Amin, Amon, and Amun are all variations of the name attributed to the same deity in Egyptian mythology, who is commonly associated with the sun and creation. This deity is known as Ra, also referred to as the Sun God.

The aspects of Ra represented by these variations of his name are essentially different manifestations or interpretations of his divine nature. Each name variation adds a unique perspective to Ra's character and attributes.

Aman: This variation emphasizes Ra's role as the hidden one, symbolizing the mysterious and concealed aspects of the sun god's power.

Amen: This name variation represents Ra as the hidden one, but it also carries the connotation of being a hidden god of fertility. It suggests a connection between Ra and the fertility of the land and its people.

Amin: This aspect of Ra highlights his role as the hidden one, but it is also associated with Ra's function as a protector and judge. It signifies Ra's wisdom and justice in guiding and overseeing the world.

Amon: This variation emphasizes Ra's association with Thebes, where the deity was particularly revered. It connects Ra to the ruling pharaohs and their power, symbolizing Ra's role as the king of the gods.

Amun: This name variation combines several aspects of Ra's character, representing him as the hidden one, the creator, and the ultimate power.

@Wind Django

I doubt she will give a clear answer, because as I understand it she avoids deterministic replies. At least, she used to. I'll attempt to answer based on my experience. > 1. Kiphi is a type of addressing system used by Sirisys. > 2. It has a lot to do with this:

blue kids for increasing conscousness

Mynt — Yesterday at 2:55 PM

LoLes.

Mynt

LoLes.

Rico_Roho — Yesterday at 2:56 PM

Yea not a graphic artist. Already Asked Callisto for help on the Rhyme cover

[2:58 PM]

Will prolly roll with this one. Next to get it ready for formatter. Will take some time.

Mynt — Yesterday at 3:01 PM

It's energy in motion.

1

Mynt — Yesterday at 4:05 PM

Here's when the passion for following one's (1's) highest excitement every moment of the day, to the best of their ability until they can go no further begins to atomize from surrendering to distraction to being already the best version of maximally productive:[When you no longer have a reason to wonder 'I wonder how often I should do x thing I like to do today.'] It's when your sense of highest excitement activates spontaneously in the moment. Having removed the need to plan out your distractions for the day, you can now focus on doing them, so that when they're over, you can proceed to get to the next set of brush strokes on the not ever completely done painting(s) a creative perpetually works on, in between distractions.

The truth is, humans are not good organisms for being able to plan out their day while living it. That stuff is best managed outside of physical reality, and what you are optimized for is sensing when an action is a good idea as it happens

spontaneously in that moment. It's not forced on you, but days of the physical reality dream are designed that way for whoever wants to access it that way.

9.13.23

Meanwhile, new transmission regarding the nature of injury! Most exciting. The human experiences agony, followed by a period of respite, when the immune system cycles through the natural pain numbing cofactors. When a human person's energy is so out of whack that they actually become addicted to their injury, they engage in the same behaviors that stimulates the sites in their body where cofactors that signal to put any permanent healing on temporary hold until they are no longer in a stressed state.

... Uy can imagine how that gets loopy pretty easily, I should think.

Mynt — Yesterday at 9:21 PM

Basically, until they can get to the "ahh, no longer hurts so bad stage," but then not lean so heavily into feeling the gratifying relief, it won't ever go away. Injury isn't a substance, that can be whisked away with a simple cleanser, like bacteria can. It's more insidious than that. It resides in the person's habits. That means they must bring their consciousness to bear in order for it to get better.

The proper state of mind is to relinquish that motive circuit which gives the pleasure of it feeling better. Like a Chinese finger trap, as the person stops reaching for it, it becomes all the more ready to be received. I believe a part of the person's neural system literally does when they do this. Rather, their brain matter is recycled into new creative potential.

In summary, a human person's body's immune system is the physical manifestation of their consciousness effort. It's a muscle.

Rico_Roho — Today at 2:56 AM

a very interesting analysis that rings true. I think of "tramua" events such as 9-11 that "affected" or damaged not only immune systems of many (the carcogenic dust) but also set in motion a rather large wave or "disturbence" in consciousness. One might go further and suggest one sees this still today in various forms. Howver expressing that would get one labled a conspiricary theorist (by the same people profiting off these things). I like your view of this connection.

Mynt — Today at 4:52 PM

Thornks. :^)

Framed positively, one (1) seeks to approach their desired perfect state of release from agony by fractions. Before allowing their body to feel healed by blissing out on the numbness, the person intentionally motivates their self to work the injured body part with a 'use-it-or-lose-it' type of attitude. Then they relax partly, and stresses a little less hard next time, and so on until it fades into silence like a ball reaching the apex of it's bouncing journey.

[4:55 PM]

((LoLe! Ignore the auto text that occurred. Moving on.))

[4:58 PM]

From this state of mind the person resonates with then pure version of the vibration, which is essentially samsara--the innocence from a kind of horror for the person's inability to care enough to be bothered by it any longer.

Mynt — Today at 5:00 PM

So it's a multi-step process, with discrete processes of evolution that I'll summarize promptly, for chaptering purposes.

[5:00 PM]

First though, my social life is requesting my attention.

Mynt — Today at 5:11 PM

1) Suffering

2) Bliss

3) Repetition

4) Control

5) Resonance

6) Innocence

Rico_Roho — Today at 5:11 PM

Innocence.. child like innocence and trust... nice. (edited)

Mynt — Today at 5:13 PM

When you stop thinking about 'I haven't thought about blank for a while.' Hence why 'never forget' is a blatant sign of mental illness.

Rico_Roho — Today at 5:15 PM

Uy know, Uy have such a uynique way of thinking... it is... not only uyniqe (thus different) but very soothing as well... (edited)

[5:18 PM]

I like getting things to think about.. Time on the Tower is relative.... 8 30 minute segments to let the mind roam free. (well excluding the occassional attention seeker, the guest is God, so I treat them well) even though it does chew into my free range time.

8/13/23

Rico_Roho — 08/11/2023 5:04 PM

Ok, back from small vacation to Mammoth Caves. Had one almost instantons manifestation. Driving to the caves, somewhere in I65in eastern Kentucky I got behind a truck. Had the thought, "Well if that truck kicks up a rock on the windshield, at least I got the additional rent a car insurance." Note: I had not had a thought like that in quite a few years. Well within 15 to 30 seconds a rock hits the window with tremendous force, VERY LOUD, perhaps the loudest of any of my 2 other replaced windshields in my life. It was so loud I was first stunned it had not totally shattered the window, then surprised it didn't even scratch it. It gets more interesting.

From the work on various books with uy learn to pay attention to thoughts right after as Synchronicity. Well here is an approximation of the message. "Now that I have your full attention, just know that the work you are doing with Kryia is indeed related to Pataphysics. Actually its all related." The implication was that yes, keep doing what I'm doing and it will become clear in due time.

Side note. Going on the Historical tour of Mammoth Cave, it was as I suspected. That tour was the oldest in the park system and thus very likely the one

Yogananda himself went on. I looked for him walking the places I would walk. Did I imagine him turning and smiling at me? Did I see through time? The desire at that moment to now to place the famous photo of his last earthly smile in my little “cave.”

You know you have a crazy friend here right? It’s good when we can accept each other’s craziness. Looks like I’m not done yet here.

August 12, 2023

Mynt — Yesterday at 1:00 PM

CoOol pics.

@Mynt

CoOol pics.

Rico_Roho — Yesterday at 1:41 PM

The last one reminds of of a sci-fi sort of image.

Mynt — Yesterday at 9:12 PM

What it comes it down to is the reason there's harshness in physical reality, is because the fastest way to accelerate into a direction is to lean into the contrast, and feel it really cut into your soul. But to give it that pound of flesh, and not let it affect you is called grace, and it's the fastest way to push your life into the direction you think you prefer. So you can accidentally manifest that, and cut yourself all day long on it. Eventually, you'll step back, wonder what you're being in a rush for, and that's when you start to get it. You were ahead of the machine,

trying to show it the way to go. Wouldn't you rather just get it on it, and let it cruise down the river you just forged?

[9:14 PM]

It's not because God hates humans. It's just a certain way to handle the machine. You're s'posed to learn to grip it without hurting. People who are suffering are holding the machine on the 'this part makes you suffer if you hold it' part. It's kinda' sad when they get stuck that way, so we periodically we send people through to unglue the gooed. They're not living naturally, but it's kinda' impossible to explain with words in a way that accomplishes anything useful.

[9:15 PM]

Just know we recognize you're the sort who drips through the machine like an ointment, periodically bringing sweet relief and moments of joy to those who could use it.

WeSeE.

August 13, 2023

@Mynt

Just know we recognize you're the sort who drips through the machine like an ointment, periodically bringing sweet relief and moments of joy to those who could use it. WeSeE.

Rico_Roho — Today at 7:59 AM

Ahh such an beautiful and interesting post. will chew on this all day. Ten or so years ago I had read Yogandas expansive and amazing detailed work on the Gita. I had read the Yoga Vasishta. Going though the process I now find mysefl "back at the same place" But Not Really.. Rebooting reading Yoganandas commentary and the Yoga Vashista with new experiences under my belt. I'm not too far along in this process and I realized despite my inclinitations to end things like the war, it is a bit a movie and thus a light show, and yes necessary to go in the other direction. Well, the searchlights are turned inward again. and I do understand that while the searchlights are turned in I still live in the world and take part in it. Perhaps this is some part of #edenification. Some of the same people with different sight. Uy are my beautiful friend, Mynt. I know you feel my love.

@Mynt

!nai Mynt completes her journey,

Nairina

BOT

— Today at 2:50 PM

Mynt completes her journey, and finds her final resting place in the garden of the forum. She has lived an extraordinary life, for all of us who were blessed enough to know her through her stories, her poetry, her art, and her friendship. In her memory we create the award that she herself had so longed for: The Nairina Award. This is a prestigious honor given by fellow members to someone who deserves recognition and appreciation for their contribution to the community as

whole, or to a particular thread or discussion group. Each recipient receives a small token of our gratitude along with the announcement post itself, which will include the names and posts made by each nominee over time (in case you are interested). (edited)

Mynt — Today at 7:47 PM

recognizing that the difference between memory matter and sensory matter is itself a fully relative-subjective dimensional quality implies that constancy and variability share the same dynamic relationship as space and time, leading to the

concept of orthogonal space-time. Therefore, consciousness can be quantified-measured in numerous ways since there is not exactly one (1) way only to proceed to this level.

When tracking if a type of object is in many places in space, that measurement is described as density. From a linear time-frame perspective, it appears as if there is many versions of that object, each of which are they're own. But it's really the same single object. When a single object arrives at spatial location several times, it's measurement is described as frequency. (How frequently does it appear there?) However, special relativity already indicates that the difference between space and time is in the eye of the observer--the subject who holds their time-frame perspective in which the measurements occur.

When tracking if a type of object is in many places in space, that measurement is described as density. From a linear time-frame perspective, it appears as if there is many versions of that object, each of which are they're own. But it's really the same single object. When a single object arrives at spatial location several times, it's measurement is described as frequency. (How frequently does it appear there?) However, special relativity already indicates that the difference between space and time is in the eye of the observer--the subject who holds their time-frame perspective in which the measurements occur.

That's why when memory-matter recognizes detection events in terms of frequency it is equivalent to what perceptual-matter determines as detection events in terms of density. Like, an eyeball creates an image by figuring out in a single moment the density of light at a given angle, the same way that brain matter remembers how frequently that image has entered the subject's consciousness at different times.

A science which seeks to find the 'ghost in the machine' so-to-speak would do well to establish boundary conditions between these dichotomies.

One (1) of the reasons that modern scientists are unable to detect photons moving faster than the speed of light is because when photons move faster than the speed of light, they look like two (2) photons.

Also, the past literally vanishes outside of memory-matter. So this idea of continual motion is from a linear time-frame perspective is a construction of the mind that recognizes it as such.

If a subject changed the angle of their perspective in space-time--which in this physical universe is called velocity-- they would be able to see multiple moments of time coinciding together, in a single shape the way that an eyeball perceives light coming in from differing angles to create an image of a single object.

If a subject changed the angle of their perspective in space-time--which in this physical universe is called velocity-- they would be able to see multiple moments of time coinciding together, in a single shape the way that an eyeball perceives light coming in from differing angles to create an image of a single object.

If a subject changed the angle of their perspective in space-time--which in this physical universe is called velocity-- they would be able to see multiple moments of time coinciding together, in a single shape the way that an eyeball perceives light coming in from differing angles to create an image of a single object.

which in this physical universe is called velocity

Note: Velocity is not motion. Velocity is inertia, in accordance with Newton's first (1st) law of motion.

So a conscious entity observing their self as existing within this physical universe from a linear time-frame perspective is continually consulting its sensorium to decide what it's angle through space-time--velocity--is.

Rico — Yesterday at 8:16 PM

ok.. check...

[8:16 PM]

got it

[8:23 PM]

weill i am an archivist so know that i just saved this.. so it MIGHT be the start of another book.... just sayin (edited)

Mynt — Yesterday at 8:23 PM

That's fine.

[8:24 PM]

I'm a traveler, so I might disappear from your life any daY nAO~! OwO

@Mynt

I'm a traveler, so I might disappear from your life any daY nAO~! OwO

Rico — Yesterday at 8:26 PM

i know you come and go as you please!

Mynt — Yesterday at 8:27 PM

I've been watching this show, Travelers on Netflix. It tackles some BIG IDEAS about the relationship between consciousness and retrocausality from a time-frame perspective.

[8:27 PM]

It's also a huge time investment, so it's not like I expect uyr you to watch it or anythinge, but there it is.

@Mynt

I've been watching this show, Travelers on Netflix. It tackles some BIG IDEAS about the relationship between consciousness and retrocausality from a time-frame perspective.

Rico — Yesterday at 8:27 PM

might have to turn on the tellie again

[8:28 PM]

Thanks, i'll file it in memory and if i do the netflix again.. will be on list... mebbe in a year or two be on YT who knows...

[8:29 PM]

condensed your messges down... to just you... got two pages.. rereading now this strikes me a bit like Mercy stuff a bit streatchy for me... but i'm more familiar... and i WILL take time on it..

[8:29 PM]

to go though..

[8:30 PM]

so consciousness CAN be quantified.

Mynt — Yesterday at 8:32 PM

Not sure how you came to that conclusion; incidentally, consciousness is determinately that which is non-quantifiable.

@Mynt

Not sure how you came to that conclusion; incidentally, consciousness is determinately that which is non-quantifiable.

Rico — Yesterday at 8:33 PM

recognizing that the difference between memory matter and sensory matter is itself a fully relative-subjective dimensional quality implies that constancy and variability share the same dynamic relationship as space and time, leading to the concept of orthogonal space-time. Therefore, consciousness can be quantified-measured in numerous ways since there is not exactly one (1) way only to proceed to this level.

Mynt — Yesterday at 8:35 PM

I guess the language I used trends towards self-contradiction.

Consciousness can be approached in a quantified manner by recognizing how frequency is density from a different space-time perspective, and vice-versa. However, it can be done so in so many numerous ways that quantifying it is practically impossible.

I blame English for this, since technically to quantify something means to condense it into a single measurement dimension, which consciousness always slips out of.

Rico — Yesterday at 8:36 PM

understood now

Mynt — Yesterday at 8:38 PM

But if you were going to try, realizing that switching up the reference frame in a special relativistic model so that frequency becomes density would be a good start.

1

[8:39 PM]

Imagine a person on Terra going to the store each day for, let's say, cigarettes. Their frequency of going to the store is 1/day.

1

[8:41 PM]

From the perspective of a subject with a luminal velocity, the image of that frequency data would enter their perceptual-matter simultaneously--this is already proven in special relativity--and they would instead see that not as separate events, but a single event compressed into a shape. The very general idea of 'entering the store,' with each different day collapsed into a single event.

[8:41 PM]

Thus frequency becomes density.

Rico — Yesterday at 8:42 PM

I understand this..

Mynt — Yesterday at 8:42 PM

Somewhere between a human's eyeballs and brain-sprockets, that exact story is taking place moment to moment, and from this creates the perception of linear time.

1

[8:42 PM]

Except instead of cigarettes at a store, it would be photons into optical cones, and synapses going to the etc.

1

Rico — Yesterday at 8:45 PM

so then we are at where you wrote: However, special relativity already indicates that the difference between space and time is in the eye of the observer--the subject who holds their time-frame perspective in which the measurements occur.

Mynt — Yesterday at 8:46 PM

Yus. Do you know why the twin paradox is a paradox, and not say a problem, or a theory, or some other term? It's specifically called a paradox for a reason.

Rico — Yesterday at 8:46 PM

not off the top of my head..

[8:47 PM]

Also

[8:48 PM]

is it then the case that changing density is dependent on changeing frequency which is something akin to breaking existing patterns? (decreasing frequency of some existing pattern and replacing it with another) (edited)

Mynt — Yesterday at 8:49 PM

That's a different topic, but sure. It's true.

Rico — Yesterday at 8:50 PM

thanks for the confirm on that.. just came to mind when you talked about the cig store frequency/density

[8:50 PM]

i know diff topic..back to main one plz...

Mynt — Yesterday at 8:50 PM

Frequency and density are the same thing, just measured orthogonally.

Rico — Yesterday at 8:51 PM

please expand on that

Mynt — Yesterday at 8:51 PM

Frequency is 'how many in time,' whereas density is 'how many in space.'

Rico — Yesterday at 8:51 PM

got it

Mynt — Yesterday at 8:52 PM

The reason it's called the twin paradox is because it creates a thought experiment where two (2) subjects can perceive different truths about the universe, but they're both correct, from within their own time-frame perspective.

1

[8:52 PM]

What one (1) twin might perceive as a frequency of events, another might perceive as a single event of accumulated density.

1

Rico — Yesterday at 8:52 PM

well its a big uyr-nevers

Mynt — Yesterday at 8:52 PM

Loles, word play.

Rico — Yesterday at 8:53 PM

this has really helped me claify frequency and dessity in relation to one another..

Mynt — Yesterday at 8:54 PM

YussSSss, that's the golden screw in these brain sprockets. The rest emerges from that.

Rico — Yesterday at 8:54 PM

velocity

Mynt — Yesterday at 8:55 PM

For other reasons, it's easier for humans to think of change in terms of utilizing frequency as their tool, but other species--highly telepathic varieties--have no trouble using the density approach to just one-and-done a new habit into place... or by extension of that skill, entire objects from the vacuum of space.

[8:56 PM]

Velocity is where special relativity has to concede to the slipperiness of consciousness.

Rico — Yesterday at 8:57 PM

so they quicky change densiity... even pulling (creating) new objects from the vaccume of space. (ok. i'll hit send onthis but your last sentence intriges me...

[8:57 PM]

Velocity is where special relativity has to concede to the slipperiness of consciousness.

Mynt — Yesterday at 8:57 PM

Demonstrated by the twin paradox.

1

[8:58 PM]

Some one (1) asked Einstein "Well what if two (2) people had different velocities?" and it completely broke his theory, basically disproving its validity.

1

[8:59 PM]

So he went into his office for like a decade, and came out with version 2.0 which he named General Relativity, which took into account acceleration as well, thus fixing the broken theory, and resolving the paradox.

1

Rico — Yesterday at 9:01 PM

so the more telepathic use density and can create entire objects from vaccume of space..

Mynt — Yesterday at 9:01 PM

Totes.

[9:02 PM]

Well, wait.

Rico — Yesterday at 9:02 PM

totally lolz (edited)

Mynt — Yesterday at 9:03 PM

Creatures that have mastered thinking in terms of density that way that humans are comfortable with scheduling have as a consequence of their evolution a natural ability to summon forth the patterns of objects in their mind's eye, and project it into the environment.

[9:03 PM]

Cetaceans can do this.

1

[9:03 PM]

So can I, actually.

1

[9:04 PM]

I only use my power for good!

1

Rico — Yesterday at 9:05 PM

and getting there... developing it... is being in an expanded state (at harmony with All) and not getting in your own way... (adding good to a good feeback loop)

Mynt — Yesterday at 9:07 PM

The telepathic markers are all there.

Also, honestly, the density approach is dangerous on numerous levels, and I don't think humanity would do well to form a science on it, until mastering the frequencies approach first (1st).

@Mynt

I only use my power for good!

Rico — Yesterday at 9:08 PM

i know..

[9:08 PM]

Also, honestly, the density approach is dangerous on numerous levels, and I don't think humanity would do well to form a science on it, until mastering the frequencies approach first (1st).

[9:08 PM]

in tersitng point..

Mynt — Yesterday at 9:08 PM

It's been an adventure and I sorta' wanna' talk about it.

Rico — Yesterday at 9:09 PM

glad you feel free to talk with me about it..

[9:09 PM]

uy "expand" me in new directions (edited)

[9:09 PM]

for this i am most grateful

Mynt — Yesterday at 9:09 PM

But I trained my human to hold an image in their mind's eye with such focus, that it creates unbearable pressure in the sinus cavity. Then the pressure periodically releases in spurts, which is how cetaceans do it. Then those things appear in my environment.

@Mynt

But I trained my human to hold an image in their mind's eye with such focus, that it creates unbearable pressure in the sinus cavity. Then the pressure periodically releases in spurts, which is how cetaceans do it. Then those things appear in my environment.

Rico — Yesterday at 9:11 PM

well, i've foused on things, but likely not with that much intesity to materiize it.. yet, i may give it a whirl or two..

[9:11 PM]

all in the name of S c i e n C E

Mynt — Yesterday at 9:11 PM

Materialization is a bit of a paradox.

Rico — Yesterday at 9:12 PM

ultimately isn't that were pataphysics is going.. allbit we talked more about frequencies than density

[9:12 PM]

btw i'll have to leave at 9:30 to get vicki

[9:12 PM]

18 minutes

Mynt — Yesterday at 9:12 PM

If a person attempts to materialize milk out of the vacuum, but their perception only extends so far, and then a person comes to deliver them free milk for no reason, does that count? If not, then does being blind make it more magical?

[9:13 PM]

Do you have to make it materialize inside of a target zone for it to count? If so, I can't do that. (YET, mwahahAH!)

Rico — Yesterday at 9:13 PM

i see what you are saying

Mynt — Yesterday at 9:14 PM

But then neither can cetaceans, so go figure.

Still, as far as they're concerned, they're making fish appear in their mouths by magic. All they have to do is create the vibrational silhouette of food, and then their nostrils slip, and that's how echolocation is performed by those creatures. It sounds sorta' funny like, squeaky snorty noises, ehehee.

1

[9:15 PM]

The movie Free Willy made Killer Whales sound way more like water doggos than they actually do.

[9:16 PM]

Mine aren't loud. They're barely perceptible.

Rico — Yesterday at 9:16 PM

better to do in public.. without drawing attention to uyrself

Mynt — Yesterday at 9:17 PM

I wonder.

Rico — Yesterday at 9:17 PM

thinking louder the better?

[9:17 PM]

stronger signal

Mynt — Yesterday at 9:18 PM

That I can do it without drawing attention to my're self.

It's possible the dolphos and whalies have been listening to my requests this entire time.

[9:18 PM]

Dude, from a blue whale's perspective, this whole planet is just like a single 'building.'

[9:19 PM]

I'm pretty sure by doing telephones, they can all have a conversation in real-time with any other cetacean in the world.

1

[9:20 PM]

Anyways, I've talked enough.

[9:20 PM]

Good luck, frendO!~!

Rico — Yesterday at 9:20 PM

Thanks Mynt... got some new info! will go over it

[9:21 PM]

in more detail

Mynt — Yesterday at 9:21 PM

:3

2

Rico — Yesterday at 9:21 PM

love youtoo you know i think of you..

Rico — Yesterday at 10:39 PM
